HEAT BARRIER SOLUTIONS

IDEAL FOR COMMERCIAL SPACES AND YOUNG FAMILIES

EN Ortal's Double Glass and Screen solutions ensure that the temperature on a fireplace's outer glass layer is significantly reduced and safe to the touch. Ideal for high-traffic public venues such as hotels, restaurants or commercial spaces, both solutions create an innovative barrier that reduces the temperature of the fireplace's glass enclosure without impacting design. Supporting any type of fireplace, including front-facing, tunnel (see-thru) and multisided models, you'll have uncompromising safety and aesthetics.

NL De oplossingen met dubbel glas en scherm van Ortal zorgen ervoor dat de temperatuur op de buitenste glaslaag van de open haard sterk wordt gereduceerd en veilig is om aan te raken. Ideaal voor drukbezochte openbare locaties zoals hotels, restaurants of commerciële ruimtes, beide oplossingen creëren een innovatieve barrière die de temperatuur van de glazen behuizing van de haard reduceert zonder op het design in te boeten. Ondersteuning biedend aan elk type haard, inclusief frontale, tunnel - (doorkijk) en meerzijdige modellen, kunt u profiteren van onvoorwaardelijke veiligheid en esthetiek.

FAN EXHAUST SYSTEM

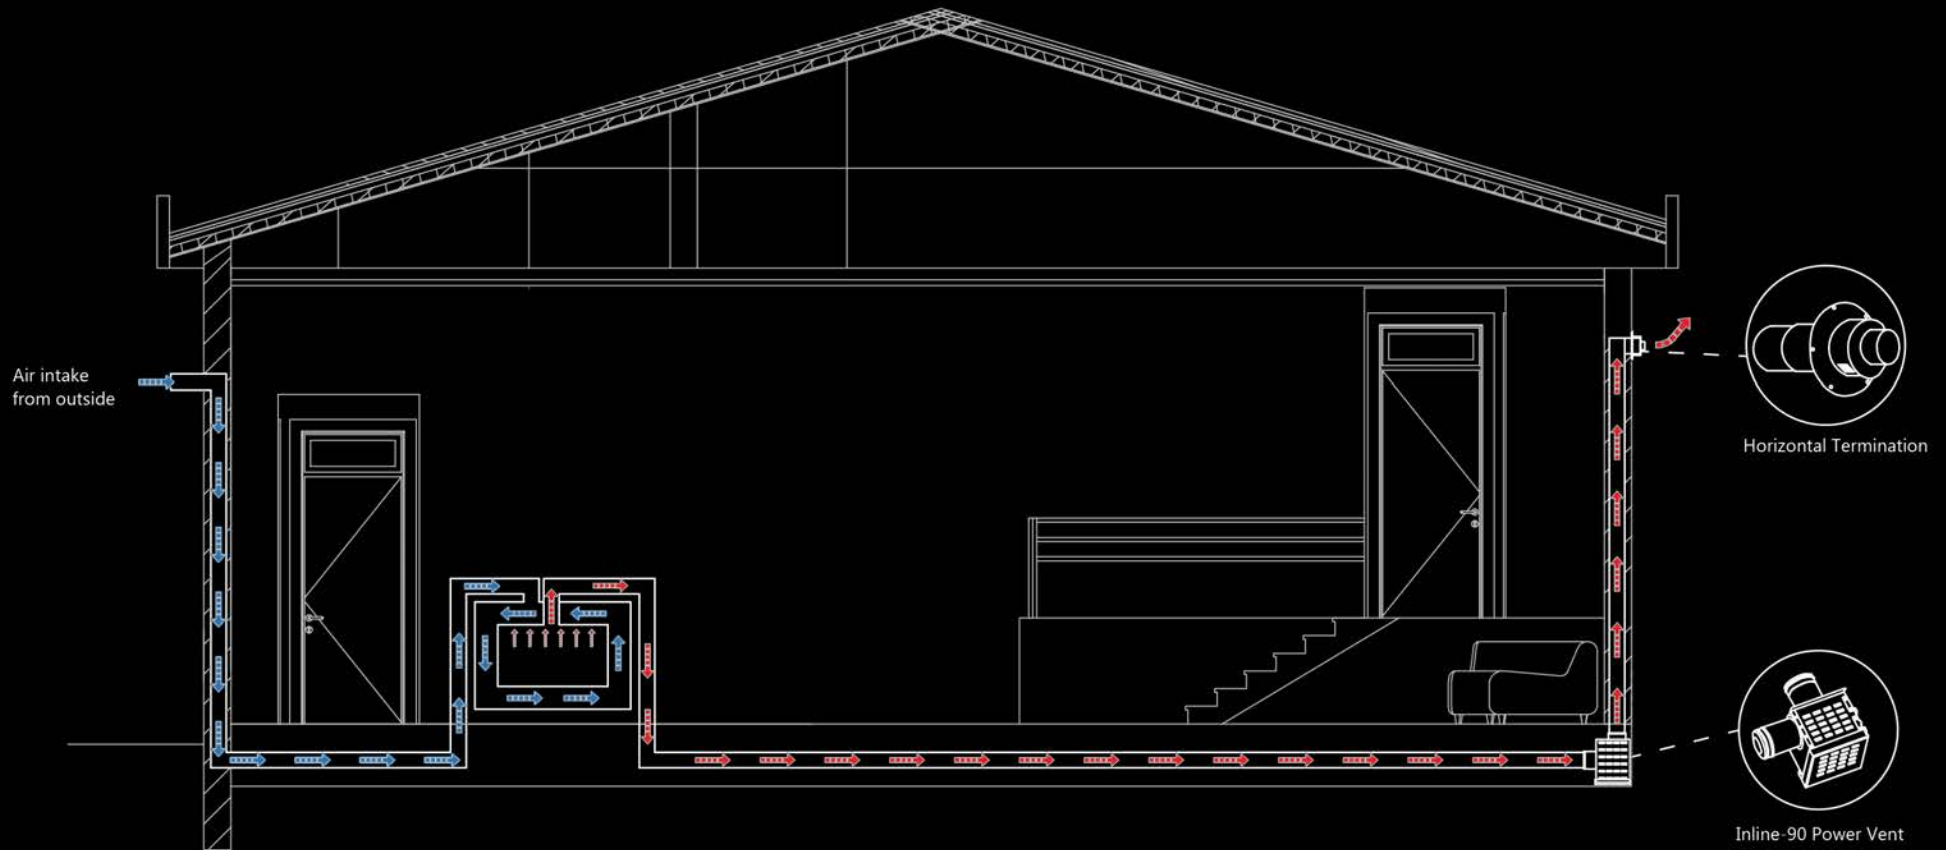

EN Among the industry's most sophisticated, Ortal's Fan Exhaust System allows you to install our fireplaces in locations that conventional direct vent systems can't. The placement of the fireplace is no longer dependent upon the venting pathway. This system allows increased flexibility for locating the appliance inside the building.

DE Ortals Lüftungssysteme mit Kraftantrieb zählen zu den fortschrittlichsten der Branche und erlauben die Installation von Kaminen an Standorten, wo herkömmliche Lüftersysteme nicht anzubringen wären. NL Dankzij het ventilator uitlaatsysteem van Ortal, een van de meest geavanceerde op de markt, kunt u onze open haarden installeren op plaatsen waar een conventionele haard met directe ventilatie uitgesloten is. De plaats van de haard is niet langer afhankelijk van het rookkanaal. Dit systeem vergroot de flexibiliteit van de locatie van de haard in het gebouw.

ES Entre los más sofisticados de la industria, el Sistema de Ventilación Mecánica de Ortal le permite instalar nuestras chimeneas en lugares en los que no se puede instalar sistemas de ventilación directa convencional. DUAL-LINE BURNER

EN Ortal's dual line burner features two lines that can be controlled separately, ensuring the best visual effect and avoiding overheating. It is the only fire in the market that covers the full length of the fireplace even when working at a lower setting. When the two line burners are operated at full capacity, the room will be quickly heated. In warmer days the visual effect of the fire is preserved by operating just one line alongside the full length of the fireplace. The dual line burner is available in all models except clear 40 models.

NL De haard van Ortal met dubbele brander is voorzien van twee rijen die afzonderlijk regelbaar zijn, voor een prachtig visueel effect zorgen en oververhitting voorkomen. Het is de enige haard in de markt die over de volle lengte van de haard brandt, ook als de haard laag is ingesteld. Wanneer de twee rijen branders op volle capaciteit zijn ingesteld, zal de kamer snel warm worden. Op warmere dagen blijft het visuele effect van de haard bewaard door slechts één rij over de gehele lengte van de open haard aan te doen. Haarden met dubbele brander zijn verkrijgbaar in alle modellen behalve bij de clear 40 modellen.

DE Der Dualbrenner von Ortal unterstützt zwei getrennte Leitungen, die separat gesteuert werden können, um visuelle Effekte zu erzielen und eine Überhitzung zu vermeiden. Das ist der einzige am Markt erhältliche Kamin, der auch bei niedrigen Einstellungen über die komplette Länge befeuert wird. Wenn beide Leitungen des Brenners auf höchster Stufe betrieben werden, heizt sich der Raum schnell auf. An wärmeren Tagen bleibt der visuelle Effekt erhalten, indem eine der beiden Leitungen über die gesamte Länge des Kamins befeuert wird. Der Dualbrenner mit zwei Leitungen ist für alle Modelle mit Ausnahme von Clear 40 verfügbar.

ES El quemador de doble línea de Ortal presenta dos líneas que pueden ser controladas por separado, asegurando el mejor efecto visual y evitando el sobrecalentamiento. Es el único fuego en el mercado que cubre toda la longitud de la chimenea inclusive cuando trabaja en un ajuste más bajo. Cuando los quemadores de dos líneas son operados a plena capacidad, la habitación se calentará rápidamente. En días más cálidos, el efecto visual del fuego es preservado operando solamente una línea a todo lo largo de la chimenea. El quemador de doble línea está disponible en todos los modelos, excepto en los modelos clear 40.
